AREA OF SPECIALIZATION

In the past 8 years Jane has specialized in the implementation of Oracle/JD Edwards Asset Management applications.

PROFESSIONAL EXPERIENCE

Implementation Experience

“Implementation” tasks include: scoping the projects; developing work breakdown structures and budgets; managing own budget; meeting milestone and task timelines, identifying, tracking, and resolving issues; facilitating workshops, bench marking and best practices, prototyping solutions, delivering client training, testing, data conversion, end-user training, development of design books and other documentation, post go-live support, and working proactively with the project manager to address budget and systems issues.

Leadership Roles:

2011: Oil & Gas Company, Calgary, Alberta: Leader of JD Edwards Finance Team. Backfilled this management position until a permanent replacement was recruited. Reported to the Director of JD Edwards and Special Projects.

2010: Oil & Gas Company, Calgary, Alberta: Leader of Oil Sands JD Edwards EnterpriseOne Application Support Team.

2008: Oil & Gas Company, Calgary, Alberta: Project Manager for the JD Edwards Asset Management split from one company to two companies.

JD Edwards Asset Management:

2010 Oil & Gas Company, Calgary, Alberta: Asset Management Business Analyst and Systems Support, for JDE 8.0.

2009 Construction Company, Edmonton, Alberta: Lead the CAM upgrade from JDE 8.0 to JDE 8.12. Also developed client training end-user training material using the Oracle “User Productivity Kit” (UPK).

2007/2008: Facilities Management Company, Toronto, Ontario - one of the largest Outsourced Facilities Management companies in Canada. – provided consulting support in Asset Management, Call Center, Job Costing, Fixed Assets, and Service Billing, for migration of multiple platforms to JD Edwards 8.9.

2006/2007: Large South American mining operation: Bolivia - Co-Project Manager and lead consultant for an implementation of Oracle JD Edwards EnterpriseOne 8.10 Capital Asset Management modules. Lead the Project Scoping (timeline and budget development), Process Design, Requirements Analysis, and system configuration.

2006: Pulp and Paper Company, Wisconsin: Led the implementation of Oracle JD Edwards EnterpriseOne 8.11 Capital Asset Management modules. This was a transition from SAP requiring maintenance management best practices and data conversion. With a very aggressive timetable, this implementation was successfully completed in less than 4 months.

2005: Wood Products Manufacturer, Alberta: Led the implementation of Oracle JD Edwards EnterpriseOne 8.10 Capital Asset Management, Inventory and Procurement modules in an upgrade from World A73. Conducted workshops on KPI revisions and best practices for maintenance processes. The implementation was completed on-time and on-budget.

2005: Multi-site, Industrial Chemicals Manufacturer, Toronto, Ontario: Led the implementation of Oracle JD Edwards EnterpriseOne 8.10 Capital Asset Management applications. Conducted workshops on maintenance management best practices and KPIs. Implementation was completed on-time and on-budget.

2004: Communication Cable Manufacturer, North Carolina: Led the implementation of Oracle JD Edwards OneWorld Xe, Capital Asset Management. Closely involved in workshops on maintenance management best practices and KPIs. Implementation was completed on-time and on-budget.

2004: Food & Beverage Processor, Halifax, Nova Scotia: Led the implementation of Oracle JD Edwards World A73 Plant/Equipment Maintenance and Fixed Assets. This implementation was completed on-time and on-budget and has resulted in cost savings for maintenance, inventory and operations.

2003: Wood Products Manufacturer, Alberta: Led the implementation of Oracle JD Edwards World A73 Plant/Equipment Maintenance, Inventory and Procurement applications. Implementation was completed on-time and on-budget.

JD Edwards Manufacturing and Supply Chain

2011 – For a Computer Hardware and Software reseller: UPK Developer (Oracle's User Productivity Kit) Developed End-User Training Content for Sales Order Management using the UPK Development Tools, EnterpriseOne 9.0.

1997- 2002: Multiple customers in multiple industries. Details can be provided if requested.

WORK HISTORY

Currently, as the Implementation Manager for Cation & Company Consulting Ltd. Jane is focused on the implementation of Oracle/JD Edwards Asset Management applications for capital intensive companies in Canada and the USA.
